

A complete stack of IBM AIX Courses offered by TLC – Complete Hands-on

Opportunities are made, not found

Skills & expertise to help you increase your knowledge in the field of IBM AIX Operating System

Our instructor is a Co-author of 10 IBM Redbooks

Imparted AIX training to 1000 plus of individuals locally and internationally.

A member of a team who wrote AIX 6.1 and AIX 7.1 IBM AIX courseware's and have developed seven times IBM AIX exam certification papers

Overview

No doubt, IBM AIX is one of enterprise UNIX operating system that is globally growing with a very rapid pace. Hundreds of new customers are adding to IBM portfolio as a part of migration from different competitive environment. The biggest challenge is to timely produce sufficient professionals with AIX skills to meet both local and global escalating demand. Specially, in Pakistan the end user is left only with the choice to send their resources for AIX training outside of Pakistan because of limited availability of AIX education and training services in the country.

The main vision and objective behind this initiative is to develop sufficient AIX technical human resource in Pakistan that will not only require fulfilling national requirement but also able to cater international market demand where the presence of local AIX resource skills is less than 1%. In all honesty, this initiative will take Pakistan to a next level by producing appropriate enterprise skills in the country and provide a chance to grow at individual level.
