A complete stack of Digital Courses offered by TLC

Skills & expertise to help you increase your knowledge in the field of emerging digital technologies

TLC

Opportunities are made, not found

Organizations are really need to focus on how they can integrate their offerings smoothly and seamlessly into the digital life of their customers.

Digital Transformation is a broad subject that requires competency across **strategy** and **vision**, **people** and **culture**, **process** and **governance**, and **technology** and **capabilities**.

Program Overview

Digital transformation is a hot topic but what exactly is it and what does it mean for different organization? In this stack of technology courses, we talk about digital transformation in two ways. First we discuss the pace of change and the imperative it creates for businesses. Next we provide the context for this transformation and what it takes to win in the digital age.

There are ten courses available for our customers to select in our digital stack. Our courses are for those who want to expand their knowledge in the field of Big Data and Business Analytics, want to expand their knowledge in the field of Industry 4.0 technologies, including Blockchain technology, Data Cataloguing, Enterprise Architecture Framework, and Open Banking Payment Systems Framework.

In essence, if you really want to access to resources that will help you quickly get up and running on leading-edge technologies and looking for ways to enhance your skills profile. Then, check out these professional training courses that are designed specially for professionals who want to learn and do more using industry-proven technologies. In all honesty, if you have a goal, we can show you how to reach it.

About this program

TLC is pleased to announce a stack of ten unique vendor neutral face-to-face and online technology workshops as a part of their education and training services program. All of these courses can also be delivered in a private format for any customer at their facilities as a part of our Client Onsite Education and Training Services Program.

These workshops shall be delivered by an experienced trainers with 25+ years of career experience imparting education and training services both locally and internationally for IBM, GBM, Si3 and TLC customers. In terms of career, our trainer have served international enterprise technology vendors including IBM, Fujitsu, and ICL and a national organization Si3.

Our trainer holds various industry professional certifications in the space of Enterprise Architecture, Blockchain technology, Enterprise Servers & Storage technologies, ITIL, Information Security, Cloud Architecture, Virtualization, Green IT, Business Resilience and a co-author of 10 IBM **Redbooks** in the area of IBM AIX operating system and Power Server technologies.

Our workshops are vendor neutral which makes the attendee completely familiar with new technologies surrounding emerging and complex business issues targeting security. The idea is to build customers resources with skills so that they can understand, design & develop their technology solutions without much depending upon their vendors support.
