Digital Transformation for Business and Technology Leaders

Skills and expertise to help you increase your knowledge in the field of digital technologies

Digital forces are reshaping almost every industry, and you already understand the urgency for transformation. You need to look into options how Digital Disruption helps you formulate a successful, innovative strategy for what to do next.

Why Digital Transformation

Digital transformation is a hot topic but what exactly is it and what does it mean for different organization? In this session, we talk about digital transformation in two ways. First we discuss the pace of change and the imperative it creates for businesses. Next we provide the context for this transformation and what it takes to win in the digital age.

DX is a broad subject that requires competency across Strategy and Vision, People and Culture, Process and Governance, and Technology and Capabilities

About the instructor

Training will be delivered by an experienced trainer with 30+ years of career experience imparting education and training services both locally and internationally and have served international enterprise technology vendors including IBM, Fujitsu, and ICL.

Our instructor holds various industry professional certifications in the space of enterprise servers and storage technologies, Information Security, Enterprise Architecture, Blockchain, ITIL, Cloud, Virtualization, Green IT, and a co-author of 10 IBM Redbooks and have developed 70 plus courses in AIX, storage, information security and cybersecurity, and digital technologies.

The training course flow will be a mix of lectures, video demonstrations, and classroom discussions so that participants can have a detailed understanding of various components of technologies causing digital disruption.

Prerequisites:

Participants attending this course should be familiar with basic Information Technology concepts and the role of general system infrastructure technologies and their applications.

About this workshop

This one-day instructor led workshop is ideal for senior leadership management teams from all line-of-businesses including Board-of-Directors. The Digital Transformation (DX) journey is complex and the key objective is to bring all enterprise wide users and key stakeholders on one platform helping them to understand the core issues and gaps why most DX journeys are failed to meet its desired objectives and enterprise wide targets and goals.

In a nutshell, digital transformation can significantly improve a business's efficiency by automating manual processes, reducing errors and improving productivity. For example, adopting cloud-based solutions can enable employees to access data and collaborate more efficiently from anywhere in the world. Digital transformation has become essential for businesses to remain competitive in today's ever-changing technological landscape.

Workshop Summary

In summary, disruption is not new, and we can learn from the past how to thrive given the constant disruptions that are the hallmark of the digital age. In this session, we will explore the foundations of digital transformation and the nature of the competitive life cycle. We will look at the underlying economics of innovation and technological change. The Digital Transformation Market size is expected to grow from USD 1,697.91 billion in 2023 to USD 4,462.49 billion by 2030, registering a CAGR of 21.32% during the forecast period (2023-2028).

Change as a constant has never been truer than with digital transformation. In this session we will look at the key drivers of digital transformation including the opportunities that have already established and the challenges they bring. We will explore emerging trends and technologies, what is possible/likely in the future, and currently what we're seeing in practice.
