Zero Trust Security Architecture Framework

September 30, 2022: Clients from The Bank of Punjab, Gulf Business Machines (GBM Pakistan), NRSP Microfinance Bank Ltd, and MCB Bank Limited has attended a two-day Face-to-Face workshop on "**Zero Trust Security Architecture Framework**" that was imparted by Adnan Ikram, Director Technology Delivery Services, TLC.

This session was conducted in Lahore at Hotel Pearl Continental. This was TLC's sixth workshop on this subject in the recent past.

Participants were taught about the ZTA Framework, why Network Access Control are considered as a critical component of any ZT strategy, importance of having an Advanced Network Threat Prevention for performing signatureless malware discovery, how Next Generation Firewalls are considered as better choice compared to Unified Threat Management can help in improving security posture while reducing complexity, Identity Management principles, ZT Model and implementation methodology, ZT use cases guidelines and an action plan for starting a ZT journey. A special focus was made on the importance of "User and Entity Behavior Analytics" and its importance using MDM, IAM, SIEM, UEBA and SOAR technologies was discussed.

Our next two-day Face-To-Face workshop on "Zero Trust Security Architecture Framework" workshop is now scheduled in Islamabad on November 23 – 24, 2022. To view the complete details on this workshop, visit www.tlcpak.com/tn224.html

ZTSAF Workshop

Zero Trust Security Architecture Framework

August 4, 2022: Clients from National Bank of Pakistan, Informa (UK), Telenor Microfinance Bank Ltd, Habib Bank Ltd, and Dubai Port World has attended a two-day Face-to-Face workshop on "**Zero Trust Security Architecture Framework**" that was imparted by Adnan Ikram, Director Technology Delivery Services, TLC.

This session was conducted in Karachi at Marriott Hotel. This was TLC's fifth workshop on this subject in the recent past.

In a nut-shell, the concept of a Zero Trust Security Architecture has been around for more than a decade, but adoption did not really begin to take hold until the past couple of years. Zero Trust is a framework for securing organizations in the cloud, on-premises and mobile world that asserts that no user or application should be trusted by default. Following a key zero trust principle, least-privileged access, trust is established based on context (e.g., user identity and location, the security posture of the endpoint, the app or service being requested) with policy checks at each step.

Our next two-day Face-To-Face workshop on "Zero Trust Security Architecture Framework" workshop is now scheduled in Karachi on September 29 – 30, 2022. To view the complete details on this workshop, visit www.tlcpak.com/tn224.html

List of participants who have attended this two-day Face-to-Face workshop in Karachi

IBM AIX Operating System Courses

AIX

It gives us immense pleasure in announcing educational program for IBM AIX platform for our valued customers. The AIX educational program shall be conducted by AIX certified instructors, imparting UNIX training since 1991. Our instructors are involved in providing AIX education and training to numerous customers both locally and internationally for IBM and GBM customers.

All of our courses are imparted online, F2F at TLC office, and Customer On-site in Karachi, Lahore, Faisalabad and Islamabad

Face to Face

Live Online

Our clients & their valuable feedbacks on the quality of our education and training services.

TLC is one of a few organizations in Pakistan whose educations and training services program is based on five complete stacks of technologies including IBM AIX operating system, soft skills, digital technologies, information and cybersecurity's, and storage technologies.

Zero Trust Security Architecture Framework — NBP

Mr. Amin Manji
Chief Technology Officer

The course comprehensively delivered to its commitment of providing an excellent overview of Zero Trust. It was well pitched and appropriately paced, and the content was well organized.

Adnan's depth and breadth of experience and knowledge was clearly evident which enabled him to intersperse the sessions with a variety of relevant anecdotes from his storied past. His enthusiasm and commitment to training was clearly evident and the delivery was engaging and energetic. The punctuality was refreshing indeed.

Thanks for two days of a great learning experience.

Zero Trust Security Architecture Framework — informa

Mr. Ibad Rizvi
Group IT & Cyber Audit Manager

As always, a brilliant workshop that appropriately covers the fundamental concepts around Zero Trust and implementation best practices.

Given Adnan's technical acumen and understanding of how business interfaces and relies on technology; he is best suited to cover the content of this course.

I highly recommend all organization looking to implement Zero Trust to attend this course and benefit from Adnan's wealth of industry experience and technical knowledge.

I look forward to attend another one of your workshops very soon, Adnan.

4th Quarter 2022 Education and Training Services schedule announced

You receive an uncompromising quality of training delivered by knowledgeable and enthusiastic instructors who adhere to rigorous standards of excellence and quality.

YOUR VOICE MATTERS!

TLC has announced second half 2021 Education and Training Services program schedule. Click the link to view the complete details.

Business Resilience and Data Protection Best Practices — IBM

Mr. Kashif Aziz Siddiqui
Software Consultant (IBM Canada)

It was a great learning experience and I must say that TLC is doing an phenomenal job providing all these training's and workshops of such an excellent quality and standard.

The training material was very informative, up to date and discussion was truly inspiring.

Adnan Ikram is one of the best IT professional and trainer in IT industry, his vast experience and knowledge helps customers overcome all the challenges.

I would like to thank TLC and Adnan for such a great learning opportunity.

Decision Making and Business Analytics in Practice — GBM

Mr. Salman Rehman
Sales Manager

It was indeed an immense learning experience. The workshop provided some concrete concepts with nice balance of theory and practice.

Thank you very much for the valuable training, the workshop material provided and presented was quite impressive, which helped us to understand the basic dynamics of decision making models and business analytics.

The use-cases presented can be applied in real life and ensure more productivity in the emerging digital transformation process.

Embracing Blockchain Technology for Business Transformation: Workshop – Code: TN215

As a part of our Digital stack, TLC has announced a new comprehensive two-day workshops for their customers on Blockchain Technology.

This course is built to make the learners efficient enough in handling the different verticals and challenges of blockchain technologies. You'll become proficient enough to engage with business executives and offer effective solutions for their specific needs. Moreover, this two-day workshop will help you acquire the right skill set needed to understand key challenges and their solutions subject to contents discussed in each unit of this workshop.

With a thorough and well-structured course material, this course helps students build a strong foundation in Blockchain and cryptographic technologies related concepts and then advance their practical skills and knowledge in the subject through real-world examples and use-cases. You will learn the proven ways of approaching different business problems by following Blockchain frameworks targeting phase-wise project management and an implementation methodology following Blockchain best practices.

TLC is one of a few organizations in Pakistan who are offering five complete stacks of technology courses in the fields of Digital, Security, Soft Skills, IBM AIX Operating System and Storage technologies.

Security Stack | Digital Stack | Storage Stack

Soft Skills Stack | IBM AIX Stack

As a part of our deliverables, students will receive a laser quality comprehensive student guide along with the workshop certificate.

The Vision

The main vision and objective behind our initiative is to develop sufficient technology professionals in Pakistan in the field of emerging Industry 4.0 technologies required to fill national resource gap enabling Pakistan to cater international market demand where the presence of local technology resource skills is less than 1%. This is an attempt to take Pakistan to a next level by producing appropriate enterprise skills in the country and provide a chance to grow at individual level.

Target Audience of our workshops

These workshops are equally beneficial for the following resources.

- Employees in the workplace including technology vendors, technology business partners, customers from all business industries and Line of Businesses including Business, Application, Audit, Risk, Compliance, Security, Network, IT operations, Project Management, and Legal professionals.

- This workshop is also suitable for Pre and Post Sales Technology Specialists, IT Professionals, IT Consultants, Systems Integrators, Systems & Solution Architects, Sales and Marketing Specialists, Trainers, Project Managers, Young Leaders and Managers, individuals developing education and training services material, and future Technical Writers.

- Authors, Documentation Managers, Technical Writers, Change Managers, SOP writers and validators, Forensic Investigators, and Quality Assurance professionals.

- Project Managers, Enterprise Architects, proposal writers and personals writing for Quality Change Control.

TLC *Flex* Application Consulting Services

In today's fast-paced and rapidly changing world of Information Technology environment, the appropriate use of technology and strategic business planning solutions tailored to your business needs and objectives is the key to your success. With an in-depth understanding of technology infrastructure along with hands-on experience gained through working on critical issues in key industries of the IT marketplace, TLC is committed to providing you with top-end consulting services and solutions to meet your unique business challenges.

TLC has embarked upon a consulting philosophy that is widely in practice all over the world by offering a greater flexibility for small, mid-sized and enterprise organizations.

TLC flex is based on hourly consulting services and are available into three categories that can be utilized as a part of organizations internal Technical Review Committee and Technical Review Board.

- TLC flex 45 hours of monthly consulting services
- TLC flex 70 hours of quarterly services
- TLC extended 45 hours of quarterly services

TLC flex services can help organizations in making decisions in collaboration of their IT management in the areas of the following technology discussions related to pre and post sales engagements.

You can select any three topics out of the following services as a part of our TLC Flex IT Consulting Services.

- New Application Analysis and Design
- Application Integration
- Application Vendor Selection
- Help organizations in interviewing technical resources at senior and junior cadres.

With these services, we are offering a comprehensive suite of IT services customized according to each client's unique requirements and environments, and effectively addressing most of the business challenges our clients face.

In a Nut-shell

The core objective for adding ACS as a part of existing services portfolio is to assist organizations who do not have sufficient knowledge or human resource(s) on-board in selecting a right vendor because of vendor specific product knowledge, new software and application functionality, life cycle management, latest software trends and techniques for selecting appropriate development tools, and above all reducing overall CAPEX required for a new project.

In addition to above, we can also help organizations in building software technology roadmap in conjunction with vendor specific application product, and may help in performing in-house software/application development.

Services Code:
CS304

TLC mission is to be a leader in delivering high quality, knowledgeable, and cost-effective application consulting services. Our foundation is built on providing creative and unique solutions that are committed to servicing our clients' goals and objectives.

The core objective for adding ACS as a part of existing services portfolio is to assist organizations who do not have sufficient knowledge or human resource(s) on-board in selecting a right vendor because of vendor specific product knowledge, new software/application functionality, life cycle management, latest software trends and techniques for selecting appropriate development tools, and above all reducing overall CAPEX required for a new project.

TLC offers a full range of professional consulting services. Whether you are starting a new project, require optimization to an existing application, or migrating from an existing application or database to a newer level or version, we have an affordable solution for you.

An outsider's perspective can bring unexpected value to your organization

In a nut shell, our consultant shall act as a bridge between a customer organization and a vendor organization to rightly size the overall solution knowing what is best for the organization by controlling the overall CAPEX.

Every business will benefit from quality advice and immediate results. Seldom do businesses, of any size, possess all the best experts or updated methods in order to generate continued results.
TLC offers a full range of professional consulting services. Whether you are starting a new project, require optimization to an existing application, or migrating from an existing application or database to a newer level or version, we have an affordable solution for you.

A List of C-Level IT and Business Leaders who have attended our Technology Workshops

TLC is one of a unique organization offering a variety of exclusive professional courses that are being attended by C-Level technology and business leaders around the world. Following are some of the leaders who have attended our courses with the name of their organizations at the time when they have attended our workshops. Most of these professionals are still the part of same organizations.

This workshop will be conducted by a team of certified enterprise architecture, GCIT and ISO/27002 experienced facilitators imparting enterprise-wide professional services for various customers both locally and internationally to different industry market segment.

Workshop Code: WS305G

An outsider's perspective can bring unexpected value to your organization

Skills and expertise to help you to upskill your present knowledge in the field of Storage, Digital Transformation, and Security technologies.

In a nut-shell, you receive an uncompromising quality of training delivered by knowledgeable and enthusiastic instructors who adhere to rigorous standards of excellence and quality.

List of new courses under development

TLC is one of a rare organization who are offering unique set of courses in the space of five different categories. Teams at TLC are engaged with different clients and based on their feedbacks developed new courses to meet their demand as a part of their TNA program. For example, Bank AL-Habib Ltd has requested TLC to developed a workshop on technical writing for their teams of technical writers in Karachi. Later, a two-day workshop on technical writing was delivered at their corporate head office in Karachi that was attended by 20 of their technical writers.

Following is the list of new courses that are in the development process and will be announced during first quarter 2023.

- Containers Security and CASB/SASE Architectures
- Demystifying Zero Trust Implementation for the Hybrid Enterprise

The Vision: The main vision and objective behind this initiative is to develop sufficient storage, security, digital technology professionals in Pakistan that will not only fulfilling national requirement but also able to cater international market demand where the presence of local technology professionals is less than 1%. This is an attempt to take Pakistan to a next level by producing appropriate enterprise skills in the country and provide a chance to grow at individual and national level.

Security is a Shared Responsibility

One of the core tenets of National Cybersecurity Awareness Program this year is "**Secure It**." "It" also refers to the overall security posture you help yourself and your organization maintain. Security is a team effort and a **shared responsibility** to **protect** your **brand**.

Security is part of a proactive mindset. That doesn't mean you should live in a constant state of fear. Being security minded means you take precautions and follow industry standard best practices that will reduce your risk of becoming a victim of fraud or other criminal activity. And if you do that for your own sake, by extension you'll enhance the security posture of your organization.

Below is a complete stack of security courses offered by TLC.

1) Information Security Essentials for Corporate Users
2) The Core Fundamentals of Cybersecurity
3) Cybersecurity Risk Management Framework
4) Essential Elements of Network Security
5) ISO/IEC 27001 Foundation
6) Zero Trust Security Architecture Framework
7) Cloud Computing Security Reference Architecture Framework
8) Storage Information Security
9) Business Resilience and Data Protection Best Practices
10) The Core Fundamentals of SAN Zoning
11) Building an Effective Security Operations Center
12) The Role of SOC Analysts in managing Enterprise Security
13) Fraud Detection and Prevention using a Data-Driven Approach – To Be Announced

https://www.tlcpak.com/security-stack.html

TLC is one of a few organizations in Pakistan who are offering five complete stacks of technology courses in the fields of Digital, Security, Soft Skills, IBM AIX Operating System and Storage technologies.

All of our courses are designed and developed by TLC and are taught by highly skilled passionate instructors who are imparting technology courses since 1991 both locally and internationally. Our instructors have acquired various industry professional certifications from IBM, The Open Group, SNIA, NetApp, ISO/IEC Information Security, Fujitsu, VMware, ITIL, Microsoft, and BCG - A Charted Institute of IT. One of our instructor is a seasoned instructors who co-authored ten IBM Redbooks developed at IBM International Technical Support Organization (ITSO) in Austin, Texas, USA in the field of IBM AIX Operating System and IBM Power Server technologies.

About the instructor

These workshops shall be delivered by Adnan Ikram, an experienced instructor with 25+ years of industry experience as a technology leader and educationist having imparted training services both locally and internationally for IBM, GBM, Si3 and TLC customers.

Adnan's professional career spans across international enterprise technology vendors including IBM, Fujitsu, and ICL and a national organization Si3. Adnan holds various professional certifications covering a breadth of technological landscape including enterprise servers & storage technologies, Information Security, Enterprise Architecture, ITIL, Cloud, Virtualization, Green IT, and has co-authored 10 IBM Redbooks covering IBM AIX Operating System and Power Server technologies and have developed 70 plus courses on IBM AIX, storage, security, digital emerging technologies, and soft skills.
