

# Cyber Threats and Safeguards Assessment Service

*An outsider's perspective can bring unexpected value to your organization*

## More Crises means more opportunities for Cybercriminals

Landscape have been completely changed as an outcome of Covid-19. Working from Home was never been targeted as a norm. Current disruption caused organizations to come up with a strategy to implement necessary safeguards to prevent against threats and in this regards most organizations have implemented these safeguards by themselves.

The scope of this two day service is to identify possible gaps in the overall WFH client implementation by performing a smart "Gap Analysis" of your enterprise wide operations where a large number of users are working from home.

*75% of organization say they have significant cyber risk exposure when working from home*

### Scope of Service

In this assessment service, we will be studying your present setup and build up a checklist of cyber threats & safeguards implemented by your organization and shall include necessary information in our final report targeting ISO 27001. Our report will be consisting of the following controls.

- Possible threats with respect to client WFH strategy.
- Vulnerabilities with complete description.
- Explanation of the risk.
- Safeguards.
- ISO 27001 Controls.
- Explanation of the safeguard.

### Duration of Service

### A little backdrop

- 42% of an unauthorized access & 31% Malicious Code has taken hold as the leading cause of incidents for client services – as a 20 year old vulnerability name Shellshock spurred a surge in unauthorized access attacks.
- 40% of companies that suffer a massive data loss will never reopen – Gartner Group.
- Based on publicly disclosed information, misconfiguration and insider threat was the origin of majority of cyber-attack breaches. Remember, the weakest link is always the human link.

To address security, leaders must avoid common myths

My company is not infected. (It is.)

Whatever I have done is enough. (It is not.)

There's a silver bullet to protect me. (There isn't.)

I will put my organization in lock-down. (You don't.)

*Skills and expertise to help you increase the business value from your Investment.*
